

APPLIED ARTIFICIAL INTELLIGENCE (CERTIFICATE)

Applied Artificial Intelligence Certificate

The Applied Artificial Intelligence (AAI) certificate program equips students to understand, evaluate, and responsibly engage artificial intelligence from a Christian worldview. As AI increasingly shapes communication, education, business, and culture, students need both technical awareness and moral discernment to navigate this changing landscape.

The program integrates biblical and ethical reflection with hands-on exploration of AI tools, focusing not on how AI is built, but on how it is used by people and for people. Grounded in the conviction that all humans are made in the image of God (Imago Dei), the program emphasizes the responsible, just, and creative use of AI to promote human flourishing.

Course Requirements

Code	Title	Hours
AAI-110	AI AND THE HUMAN EXPERIENCE	2
AAI-210	COMM WITH MACHINES: THE ART OF AI PROMPTING	3
PHI-321	ETHICS IN THE AGE OF AI	3
Total Hours		8
